## MISCELLANEOUS ACTION

### *Response to Amendment*

1. The reply filed on May 2, 2003 and June 23, 2003 are not fully responsive to the prior Office Action because of the following omission(s) or matter(s):

First, the amendment to the claims is improper as filed, particularly since changes have been made by bracketing and underlining but no clean version of the claims has been provided. The active version of the claims is the clean version filed December 2, 2002 (paper no. 13). Any changes since that version should be submitted using the current accepted format which includes using underlining for insertions and strike-through for deletions. All of the claims should be submitted with each claim including a status identifier. It is emphasized that changes to the claims should be made with respect to the active version of the claims (i.e., the version filed December 2, 2002).

Second, the amendment to the specification is improper as filed, particularly since changes have been made by bracketing and underlining but no clean version of the specification has been provided. The active version of the specification is the originally-filed version. A substitute specification should be submitted in the current accepted format which includes using underlining for insertions and strike-through for deletions. It is emphasized that changes to the specification should be made with respect to the active version of the specification (i.e., the originally-filed version).
